SESSION PREP GUIDE

Your nails will show in your photos so they better be camera ready! Follow these five tips to take your nails from eww to oooh!

CHIPPED NAILS, EWW

There's nothing worse in senior portraits than chipped nail paint. If I decide to place your hands next to your face, unsightly nails could draw attention away from your pretty face.

KEEP IT NEUTRAL

Getting trendy with nail color can date your senior pictures and you want to remain classic and timeless with beautifully polished neutral nails.

KEEP YOUR HANDS MOISTURIZED

Moisturize for the entire week before your session. Use a heavy moisturizer on your hands, and cutile oil on your cuticles and nails to help heal any cracked skin or broken nail beds.

DON'T FORGET YOUR TOENAILS

Especially if you're going to show off your toes in peep toe heels or sandals. Remember to keep your toenails perfectly pampered with a professional pedicure.

WHEN IN DOUBT, HIRE A PROFESSIONAL

The best thing you can do at least two days before your session is to get a professional manicure!
